## LET ME INTRODUCE MYSELF, I AM :

Ms. Mc

My journey into education was not the way of most. My daughters were my world and ultimately my guide into the world of education, after 20 years in medicine/dentistry. I loved being that room mother and everything about the school experience. At the age of 35, I decided to jump into the world of being a non-traditional student. I received my B.A. in Special Education in 1997. Loving the feeling of learning, I jumped right into graduate school and in 1999, graduated with a dual Masters Degree Emotional /Behavioral Disorders and Interrelated Learning Disabilities. I again pursued more studies and graduated with my Ed.S. in Early Childhood with a Reading Endorsement add on. I have been blessed to work not only as a teacher, but also a Family Service Coordinator, as well as, a Case Manager for adults. I continuously strive to be a life-long learner and pray to be that guiding light for those incredible individuals, both children and adults. Looking forward to seeing you!
